

# Rocscience Inc. is pleased to announce our tour of New Zealand and Australia next February/March 2009

After a successful tour of India this fall, Rocscience is ready to get back on the road! Dr. John Curran, our Founder and Director, and Ms. Evelyn Cunningham, President, will be visiting New Zealand and Australia over a three week period beginning the middle of February 2009.

Dr Curran and Ms Cunningham found last year's trip to Australia to be rewarding on many levels and are looking forward to including New Zealand in this year's tour.

We hope to accomplish two things during our visit.

First, we'd like to take the opportunity to visit our longstanding customers for feedback and discussion about how we're doing. Customer feedback is a huge part of our product development and we value all comments provided.

Second, we receive many enquiries from our New Zealand and Australian customers regarding training seminars and generalized courses for our software.

We are certainly interested in providing our customers with courses which meet their needs and we're more than happy to customize courses as necessary. There is still time to include your company in our tour and we would be happy to do so. We hope to be able to meet with you and your colleagues during this year's tour. If you have any interest in a customized course at your office or even just a visit to discuss our software, please do not hesitate to contact us with any requests or suggestions at [software@rocscience.com](mailto:software@rocscience.com)

For more information on Rocscience Training Courses, please see our [Workshops](#) web page.
