

## Unwedge 3.0 Multiple User License Options

For larger businesses with more complex user requirements, Rocscience offers special multiple user pricing. Choose a Single License or Network License package, or a combination of both...whichever best suits your company's unique needs.

### Single Licenses

The Single License offers the most flexibility for the user. Install *Unwedge 3.0* on any computer you wish and then simply move the lock between computers as needed. This type of license is ideal for lap-tops and field-work. With Single Licenses, you own your license outright, purchasing future *Unwedge 3.0* releases at an upgrade price. All regular updates are free.

Each Single License is sold with a USB lock, which allows you to install *Unwedge 3.0* on any computer. If multiple users in your office need to use *Unwedge 3.0*, you can purchase one Single License and share the lock. A Single License copy of *Unwedge 3.0* costs \$1195 USD, plus shipping. Canadian customers, please contact us for current conversion rate.

Alternately, you may choose to buy multiple copies of our *Unwedge 3.0* Single Licenses. We offer competitive volume discounts for customers who purchase 5 or more copies at a time:

No. of Copies	Price per Unit (excludes shipping)
5 - 10	\$1075
10 - 15	\$1015
15 - 20	\$955

### Network Licenses

The Network License is most useful in larger offices, giving access to an unlimited number of users without the need for a USB lock. The number of concurrent users is determined by the size of the Network License purchased. This license is installed and managed by your company's network manager, so availability and use is transparent to you – when you need it, simply log on to your own network. Rocscience Network Licenses are offered as an annual subscription that includes *Unwedge 3.0* upgrades that are released during the year, as well as our regular free updates.

No. Concurrent Users	Total Annual Subscription (excluding shipping)
1	\$595
2	\$1190
3	\$1785
4	\$2380
5	\$2975
6	\$3570

Canadian customers, please contact us for current conversion rate.

*Thank you for your interest in Rocscience software.*
