

Students At Work

Summer Term - 2010

"I improved my mathematical modeling techniques, programming, and research skills. It was a big step-forward in my career."

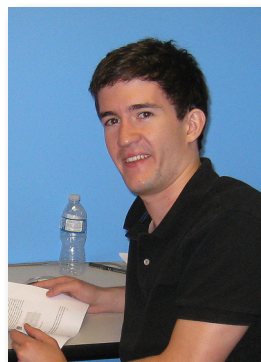

"One of the best aspects of this job was the people I worked with, making this a very enjoyable summer job."

Rocscience regularly hires students as geotechnical interns to work with our engineers, contributing their fresh perspectives and academic talents towards the engineering software development process.

In the past, students from civil, mechanical, electrical, geological and geotechnical engineering have joined our group, expanding their experience in the software development field.

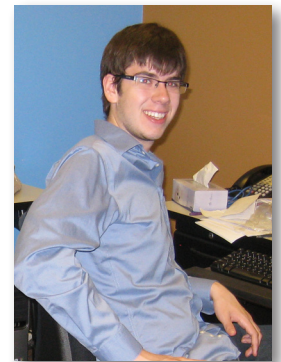

If you think an internship at Rocscience would be for you, please contact us.

"I learned more about geotechnical engineering methods than I could have imagined."

"My colleagues were wonderful mentors whose humorous jabs further enlivened the working experience."

"I greatly improved my programming skills and my knowledge of numerical and statistical methods."
